

Question 1

Objective

Decide whether exploring rules for multiple buildings on a single property is worthwhile.

Attempts

Briefly reviewed Vancouver, Surrey, and Burnaby bylaws related to multiple buildings.

Evidence

Determined that our current rule structure outlined here

(https://docs.google.com/spreadsheets/d/1-LSJ6LMKjTPDwhcj8C_DAUa8Fo60dhvHENCIL2PLTBQ/edit?usp=sharing) is probably robust enough support these rules, but more time would be needed to make sure. Spending the time to determine which types of rules exist here may be moot if it is a case that "the solution" doesn't need to consider right now. We are already only focusing on single-laneway homes right now, I expect most housing developers would be looking to build only a single building on a lot.

Diagnosis

In our weekly class presentations on Tuesdays, we are expected to show that we are on track with a plan to reach deliverables. We are hoping to wrap up our rule analysis and get clarity on this soon.

Proposed Next Steps

Omit multi-building rules from our rule analysis since it is may not be the most common case. We could start to establish the timeline and deliverables for our capstone project to meet our program requirements.

Decision Ask

Can you confirm if most housing developers would only be looking to build a single building? If so, do you agree that it makes sense to omit multi-building rules from our analysis so we can start to establish the timeline and deliverables for our capstone project to meet our program requirements?

Question 2

Objective

If needed, decided on an alternate meeting day/time for the meeting normally held on Mondays at 9:30 AM, since this upcoming Monday is Victoria Day.

Attempts

N/A

Evidence

Proof of holiday on Monday: <https://www2.gov.bc.ca/gov/content/employment-business/employment-standards-advice/employment-standards/statutory-holidays>

Diagnosis

N/A

Proposed Next Steps

If GMT representatives are unavailable Monday, we propose having the meeting Thursday afternoon or Tuesday morning instead. We are eager to establish a new timeline with clear deliverables as soon as we can, so Thursday afternoon might be better. We can work around your schedule.

Decision Ask

Inform us if GMT representatives can attend the Monday meeting, and if not provide an alternate meeting day/time.
