Profile

A natural Agile leader. Experience developing scalable, collaborative organizations, transforming them from underperforming to outperforming. Even in high-complexity, lightning-paced organizations, can clearly see what is most important, what needs attention and what will take care of itself. Combined with strong analytical, project management, and problem-solving skills, this talent helps me help teams make the impossible possible.

Experience

DISNEY CANADA EXECUTIVE PRODUCER

KELOWNA, BC
DEC 2016 - SEP 2018

Executive Producer and Studio Head for Club Penguin studio.

- Launched Unity-based (C#/C++) *Club Penguin Island* worldwide on iOS and Android. Led feature and content development along with live operations tuning, all driven by in-game metrics. Expanded game and e-commerce onto Windows PC and Mac in time for the holiday season.
- Oversaw Business Intelligence team responsible for in-game and subscription analytics and A/B testing. Improvements resulted in 10% increase in trial to paid conversion of monthly subscriptions. Identified and addressed multiple improvements to subscription service with data engineering team.
- Partnered with community management and marketing to turn around community sentiment resulting from the sunset of the 11-year old Flash game.

WARNER BROS. GAMES MONTREAL SR. PRODUCER

MONTREAL, QC
DEC 2011 - DEC 2016

Sr. Producer for two unannounced PS4/XboxOne games. Both were new intellectual properties based in the DC Comics universe.

- Evolved production management, budget management and outsourcing tools and processes, in collaboration with leads and production teams. Shared best practices across studios.
- Coached technical, creative and quality assurance teams on Scrum and Kanban development and planning practices.
- Lead Producer for Cold, Cold Heart downloadable content. Built on lessons learned from the main game to ship 50% larger scope at a higher quality than the main game, with minimal overtime.
- Directed project management team for Batman: Arkham Origins, a multi-million dollar project with a multidisciplinary team of over 150, plus contractors and outsourcing in four countries. Game was produced nearly 50% faster than average for a project that size and quality with a newly hired team at a new studio.

BEHAVIOUR INTERACTIVE SR. DIRECTOR - DEVELOPMENT SERVICES DIRECTOR OF TECHNOLOGY

MONTREAL, QC
APR 2009 - NOV 2011
DEC 2007 - APR 2009

Established Development Services, a 40-person cross-functional department including quality assurance, audio, art, outsourcing services, video productions, website and IT development teams.

- Created revenue stream by offering high-margin services to external clients. Expanded and diversified outsourcing along with establishing best practices.
- Led company-wide staff planning and prioritization. Developed simple tools and processes to improve forecasting and project allocation, resolving a variety of operational issues.
- As Director of Technology, transformed 45-person C#/C++/Python/Lua technology department into an Agile organization, breaking down silos between development teams. Champion and mentor of quality improvement and Agile practices within the company.

Experience Continued

ELECTRONIC ARTS DEVELOPMENT DIRECTOR

BURNABY, BC
JAN 2006 - DEC 2007

Merged three central C#/C++/database technology teams into a high performing, customer-oriented organization, supporting 7 development franchises and the central art department. Transitioned the team to Agile, influencing other teams and sharing best practices.

- Launched a studio-level project to implement a large-scale system for managing game metadata and digital assets, partnering with worldwide IT to align with global objectives.
- Created a global collaborative development team by in-sourcing technical resources from EA Shanghai.

KENSINGTON PROGRAM MANAGER

BURNABY, BC
APRIL 2004 - JAN 2006

Established Program Manager role with a focus on all consumer power accessories and Notebook Dock for Dell.

- Analyzed competitive products, potential market and applications to define product requirements for consumer fuel cell product.
- Sourced new suppliers, development partners, technologies and new products worldwide.

CISCO SYSTEMS NEW PRODUCT PROGRAM MANAGER PRODUCT TEST ENGINEER III MANUFACTURING ENGINEER II

SAN JOSE, CA
JAN 2002 - APRIL 2004
OCT 2000 - DEC 2001
JUL 1999 - OCT 2000

NPI Program Manager responsible for new product development and manufacturing introduction of several key CRS-1 Terabit router assemblies.

- Managed dynamic build schedule and allocation of critical components, working with long lead times, tight deadlines and complex dependencies. Ensured Engineering design was completed on schedule, including development sites in Ottawa and Israel.
- Led forum of suppliers from Japan, Korea and the US to drive technical improvement, qualification and implementation of new technology for multiple business units across Cisco.

CELESTICA SR. MANUFACTURING (QUALITY) ENGINEER MANUFACTURING (QUALITY) ENGINEER MANUFACTURING (QUALITY) ENGINEERING TRAINEE

TORONTO, ON
JUN 1996 - JUL 1999
MAY 1997 - OCT 1998
JUN 1996 - MAY 1997

Initiated, and actively collaborated with, cross-functional project teams to develop, implement and qualify process improvements, new factory layouts, and statistical process control strategies.

- Selected for company-wide business analysis project to reduce operating cost by 45%. Using manufacturing and business data collected over a year, created a comprehensive cost of quality model. Designed and implemented several technical and operational improvement projects resulting from insights from that model.
