Data Scientist | Senior IT Consultant

A highly analytical, passionate and self-motivated Data Scientist driven by problem-solving and strong interpersonal and collaborative values. Accomplished software engineering professional (Legacy Systems) with proven track record and international work experience. Multilingual with refined ability to clearly communicate complex and technical information to various audiences. Experience in banking/financial, retail and insurance industries.

Technical Skills

GitHub: Git(Pull Requests, Branching, Issues), Collaborative Software Development

Machine Learning: Classification, Clustering, Regression, Feature Selection

Project Management: JIRA, Report writing

Python: ScikitLearn, NumPy, Matplotlib, geopandas, pandas

R: Data Wrangling, Statistical Modeling, Data Visualization Techniques, Quantitative Analysis, Interactive Web-apps using Shiny

SQL

Other: COBOL, PLI, Relational databases(DB2), Excel

Software Development Lifecycle: Waterfall, Agile

Education & Certification

MASTER OF DATA SCIENCE - 2018-2019

University of British Columbia

GPA: 91.7%

BACHELOR OF TECHNOLOGY/ IT - 2004-2008

West Bengal University of Technology (India)

GPA: 3.58/4.0

Technical Highlights

UrbanLogiq (MDS Capstone Project)

April – June 2019

- Analyzed indicators of dangerous vehicle driving behavior using collision data measured at the intersection level. Applied statistics and machine learning algorithms like Logistic Regression, xgboost with SHAP values. Delivered scientific research report to communicate results to business stakeholders.

Projects (MDS program):

Mental Health Issue Tracker in Tech Company

Jan 2019

- Built interactive Web app by Shiny to visualize the data analysis. Showed the effect of mental illness on employee performance and rated employee awareness of company-provided resources.

Olympics Medal Prediction

Dec 2018

- Developed R script to analyze data. Developed python script for data manipulation. Built predictive models for the Olympic medal count for 2020 summer for each country by fitting DecisionTreeRegressor model.

Professional Experience

Cognizant Technology Solutions (Kolkata, India)

June 2016 - June 2018

Technical Team Lead

Mainframe project for Zurich insurance UK. Managed an engineering team of 11 members for process improvement, process design and business recommendations.

- Analyzed user issues to perform user research and recommended process re-design through automation, saving 180 person days of work per year
- Transitioned projects with zero escalations by maintaining up to date artifacts and constantly tracking changes along with prioritizing of user stories/backlogs
- Created process flows, user flows and maintained project status dashboard with charting techniques to strengthen customer service and relationships
- Created BRDs, HLDs, use cases and user scenarios for business analysis and business process to strengthen communication among cross-functional teams

Professional Experience continued

Cognizant Technology Solutions AG (Zurich, Switzerland)

Oct 2013 - June 2016

Business Analyst (Onsite) / Product Owner

Mainframe project for Credit Suisse AG. Managed an offshore engineering team of 8 members, designed and deployed new product.

- Led award-winning project for new product, MyIBAN, with agile development methodologies and leveraged customer data to implement customized international bank account numbers
- Supervised and participated in all stages of project life-cycle (analysis through deployment) and achieved business cases by delivering within deadline and on budget
- Analyzed large data sets to draw business insights using SQL queries and PLI programming

Cognizant Technology Solutions (Kolkata, India)

Aug 2009 – Oct 2013

Data Analyst

Mainframe projects for Toys 'R' Us and Credit Suisse AG. Performed data analysis and developed legacy system products.

- Designed and built large distributed system with Service-Oriented Architecture with modern web services on top of rich back-end. Accommodated 30-year old legacy code for business transactions to the latest web application

Awards & Recognition

Top 5 Capstone project (UBC – MDS)

2019

- Chosen for Top 5 capstone projects (out of 18 submissions) and outstanding presentation and verbal communication skills

Winner of Vancouver Whitecaps Sports Analytics Datathon

2018

- Analyzed Whitecaps merchandise sales data and customer behavior during matches to form insight and proposed creative solutions to increase sales and optimize campaigns and marketing techniques

STAR of the Quarter (India)

2017

- Zurich Financial Services UK, Insurance account (Cognizant)
- Led and mentored a team of 11 members in the newly transitioned application with no downtime in production environment

RISING STAR continental Europe, Switzerland

2015

- Credit Suisse AG, Banking & Financial Services account (Cognizant)
- Built high quality application working collaboratively with various engineering teams to generate customized international account numbers

STAR of the Month (India)

2014

- Credit Suisse AG, Banking & Financial Services account (Cognizant)
- Built an application to migrate 3.5 million documents of account holders for electronic retention

KUDOS for the Month (India)

2012

- Credit Suisse AG, Banking & Financial Services account (Cognizant)
- Worked autonomously to enhance and fix critical bugs of the application with impeccable attention to detail, which enabled new retention rules for client docs

The Perfectionist, East Zone (India)

2012

- Toys 'R' Us, Retail account (Cognizant)
- Enhanced price change management process to reduce manual intervention in stores

Volunteer Experience

Guest Speaker, Urban Big Data Analytics course, UBC

2019

- Presented Urban Data Science project and influenced aspiring Data Scientist by sharing MDS and professional experience

Ambassador, Women in Data Science

2019

- Organized Women in Data Science conference at UBC, taking care of the marketing division of the event
